Notes

Symbolic Innovation

How do we know self reporting companies actual go through meaningful transformations Many companies adopt agile symbols not real agile adoption Self report shows know a lot But look the practices and actually doing a lot Homemart - cube farm was simply relabelled agile workspace Language and meaning had become decoupled Agile symbols means something different agile practices Why do this? Directive to innovate (symbolic innovation - look like we are innovation), difficult change (organizational), fear of being behind Shortcut to real organizational change

Agile Portfolio Management

Area of Internet and mobile areas in finish broadcasting Focus on customer value and cycle time - establish common goals across the organization Picture of safe changed to company portfolio - value stream - teams Apply to all parts of the organization Company level Kanban exec meets every week - wip, etc, make decisions Need to have short decision make process work Next 3 months (now), then next 12 months. Epics on physical board. Jira used Can plan how to use allocate unused money Dashboard makes execs happy See experiences Now want to scale to the rest of the finish broadcasting area Transparency changes need for control

Development of Complex Software

Nothing for me

A Lean Design Methodology App to Internet of Things

Nothing for me
